

Room no. 01

01.

This device transported a hostile German super-soldier to a different planet. Another MCU villain tried to use this device to escape from captivity in an alternate timeline. This device holds the secret to the powers of an Avenger.

02.

In real life, this device/technology has been replicated to a limited extent by the Swiss Institute of Technology. Very loud speakers were used by the Institute in order to achieve something similar. The aforementioned technology was used by the caped crusader to map out his entire city to locate one of the villains from the Nolan Trilogy.

03.

Imagine if you had to swallow your discomfort every time you got hurt because oh they exist merely nearby. Don't let that stuff create a disturbance, aren't you afraid of your life? Hurrying to some guarded position is not a lasting remedy but only the frequency of one thing was found out to pull through.

Can you name the device discovered by an ingenious mind.
